RICHMOND, CALIFORNIA, FRIDAY, SEPTEMBER 23, 1921

No. 38

Three Special Trains of Financiers Coming

Bankers to Travel in Style to Pacific Coast

A unique passenger movement in railroad transportation, according to Southern Pacific Company officials, will take place this month when the New York state delegation to the American Bankers' association convention in Los Angeles, will reach San Francisco on September 27. The New York delegation will travel in three special trains of 12 cars each, and except for the club, observation, dining and baggage cars, the trains will carry only compartment and drawing room cars. This is said to be the first time that three trains of "all room" cars have been ordered for one movement.

The cars, not including the locomotives, used in transporting the delegation, are valued in the neighborhood of a million dollars.

Say Onions Had Become "Soft"

Stockton, Sept. 22.—Commission men here deny the charges that they destroyed 30,000 sacks of onions because of no demand and that they were endeavoring to maintain market prices. Commission men claim the onions were becoming "soft," caused from lack of cold storage facilities.

Potters on Half Time

Local potters are doing a little better than half time, and with the resumption of building operations they will soon be back on full time again. It is reported that about 75 per cent of the Richmond potters are working four days per week.

Army To "Cut Out" Red Tape

Washington, Sept. 22.—General Pershing has entrusted Col. Robert C. Davis, former adjutant general, American expeditionary forces, with the task of getting the red tape out of the War Department machinery. A memorandum issued directs Col. Davis to investigate causes of delay in handling papers with the purpose of expediting procedure.

Detroit Savings Swell

Detroit, Sept. 22.—More saving accounts are being increased than diminished in this territory. Also new accounts exceed those withdrawn. Up to August 1, the opposite was reported.

Giant Silver Tip Grizzly Captured

Montevista, Colo., Sept. 22.—"Old Glory," giant silver tip grizzly of the Rockies, has been captured. The huge bear has been trapped by John Crook of the United States biological service after a hunt of more than three months, according to word received here today.

"Old Glory," who weighs 1000 pounds, was known to all cattlemen of this vicinity as the "steer killer." Ranchers estimate that he has killed at least \$18,000 worth of cattle.

THE TERMINAL is on file in all the public libraries in Contra Costa county and has hundreds of readers.

Albany's City Clerk Must Go Through Recall Ordeal

Recall petitions to oust Albany's city clerk, Winslow N. Vierra, are being circulated, and from the large number of signers obtained it would seem that Clerk Vierra would be doing the proper thing by resigning before being turned down by an avalanche of recall votes.

Vierra is charged with negligence and has the entire city board of trustees against him. He was elected a year ago by a scant majority of two votes.

He was formerly engaged in conducting a dairy and milk delivery business in Albany, which put him in a position to form the acquaintance of the woman voter who may often permit good looks to supersede qualifications.

The compiling and readjustment of the late assessment roll by the clerk was the climax which got him "in extra bad" with the board and is said to be the subsequent and final cause for the filing of recall petitions.

Three Contracts Let For Ferryboats

San Francisco, Sept. 22.—Contracts have been let for three all-steel ferryboats for the Six Minute Ferry Company, it was announced today. Each boat will have a capacity of 80 automobiles on the main deck, with saloons and a restaurant above.

The boats will be used on the San Francisco-Oakland run, and will make the trip across the bay in 15 minutes.

Chiropractors Are Not Held

Martinez, Sept. 22.—Charges of practicing without a proper license, brought against Drs. A. B. Hinkley and H. A. Brown, Richmond chiropractors, by the State Medical Board, were dismissed Monday by Superior Judge R. H. Latimer, on the ground of insufficient evidence. The cases have been pending for some time.

Lumber Industry Better

Seattle, Sept. 22.—The official statement of the West Coast Lumbermen's Association, just issued, shows the mill production in western Washington and Oregon is only 29 per cent below normal. This is a decided gain over the conditions a few months ago.

Missouri Savings Show Gain

St. Louis, Sept. 22.—Savings accounts in banks here which have steadily diminished since June 15 have taken a trend upward and have shown an increase in the last week. This condition is also observable in the smaller cities in this section.

Shops Get Big Order For Freight Cars

Berwick, Pa. Sept. 22.—An order for the repair of 1000 freight cars for the Delaware, Lackawanna and Western road has been received by the local plant of the American Car and Foundry Co.

Berkeley Boy Travels By Airplane in Europe

Sydney Down of Claremont arrived home Monday from Europe, where he traveled for three months in England, France and Italy where he had the novel experience of journeying from London to Paris by airplane, making the trip in four hours. Among the passengers on the same plane was H. W. Westinghouse, electrical financier of the East. Down states that the airplane has become a common mode of traveling in England and France and many tourists are taking advantage of the comfortable planes and the saving of time.

Drive Auto Into Curb

A. G. Lawrence of 934 Cornell avenue, Albany, while driving on wine street near Garrard boulevard, Sunday night failed to see a jog in the street and drove his automobile into the curb, according to a report made to the police. Both right wheels of the car were broken. No one was injured.

SKETCH REVEALED TOO MUCH

Youthful Artist Had Allowed Spirit of Malignancy to Influence His Skillful Pencil.

Freddie, the office boy, has a remarkable talent for caricatures. He can take a likeness to an almost disagreeable point of perfection, and as he's only 13, he hasn't learned the art of diplomacy as yet, remarks the New York Sun.

So when Mabel, the blond stenog, asked him to "draw me," he set about it with a will. She kept fidgeting around to see each carefully penciled line as it fell into place and annoyed the young artist to the point of desperation, but on his declaring that he wouldn't finish unless she'd stop "shimmying," she subsided.

However, when the picture was completed, Freddie handed it to her, folded and then made a bolt for the door. When she opened it excitedly she gave a gasp of indignation, for though the head was her own without a doubt, every blond curl made more permanent by indelible ink, and each dimple in its rightful corner, and her costume all that she saw in her short mirror before leaving. At home, the young scamp had drawn the final touch feet incased in shoes run down at the heels and had put a hole in the stocking!

Mrs. Debroke—Jim, there's a man in the parlor to see you. Mr. Debroke—All right. I'll be there in a few moments. Tell him to take a chair. Mrs. Debroke—He's already taken the piano. He's the installment man.

BANK SHOT?

"I can't play billiards in the winter time at all." "Why not?" "Every time I get to knocking those three balls around it reminds me of my overcoat."—Michigan Gargoyle.

Real Estate Act Upheld by State Supreme Court

In an opinion rendered by the supreme court Tuesday the validity of the real estate act is upheld.

The act violates none of the fundamental principles of the state or federal constitution, but is harmony with them, in that it is a measure looking to the protection of the public and provides a measure of procedure in all respects ample to protect the rights of the licensee.

Little Elklets

C. F. Annett, the old guard, who has held down the secretary's job the past four years so efficiently, has resigned. The members of 1251 regret to lose this veteran official, a 100 per cent man.

C. F. King is acting secretary until a successor is elected.

Sheriff R. R. Veale, Tax Collector Martin Joost, Auditor Al Sullenger, Senator Will Sharkey, and 'Charlie' attended the big Elk lodge meeting Tuesday night.

Attorney A. F. Bray of Martinez attended 1251's festivities Thursday night.

Dr. H. N. Rowell of Berkeley made an eloquent speech Tuesday night at the anniversary.

Gus Lang's Arctic essay was a hot one, although on a cold subject.

FOOTHILLS OF RARE BEAUTY

Observer Asserts That Those Along the California Coast Are Unsurpassed in the World.

In beauty of form and color the foothills lying along the California coast from San Francisco to San Diego are quite the equal of any in the world. They are made up of loose granite, are sparsely covered with short growths, and have been rounded by winds and rain until they are as smooth as the Scotch hills. In the afternoon light they take up hues of heliotrope as a body color and upon this are often blended olive shades of live-oak and sycamore—the whole flattened in a decorative pattern like tapestry. At Santa Barbara these hills come down to the blue waters of the Pacific with a strange mingling of warm and cool colors that is nevertheless harmonious and supremely beautiful. Farther south and back from the coast the bare, desert foothills of the San Bernardino range have only warmth of hue, but this warmth is wonderfully delicate in rose-reds, opals, lilacs, terra-cottas, and air blues. There is no mountain color like that seen in and about the desert ranges.—John C. Van Dyke.

BACK TO OLD STYLES.

There are fashions in flowers and now there is a revival of the older fashions in flowers. New houses are built, in the style of houses of 200 and 300 years ago, and older styles than those. Furniture is made in patterns of chairs and tables and sofas of the long ago. And more men and women are talking today of grandma's favorite flower and grandma's flower garden, than have touched on such themes for many years.

TODDLER CENTERS.

"Our sawdust evangelist is going after the dancing places with hammer and tongs."

"Yes." "He says they are way stations on the road to ruin."

"Well, they're always crowded. A great many people seem to be clamoring for stop-over privileges."—Birmingham Age-Herald.

It was in THE TERMINAL.

Goat Milk Is Popular, Demand Exceeds Product

During the past three years the number of milk goats in California has increased more than fifty percent, according to H. M. Butterfield, supervisor of Agricultural Correspondence in the University of California.

Because of this great increase and the great interest in the production of goat's milk, the state university has prepared a correspondence course on "Milk Goat Raising," consisting of eight lessons.

According to authorities the milk goat is comparatively free from tuberculosis in this country and, therefore, the milk is in large demand for feeding babies. The keeping of a goat is more economical than the cost of keeping a cow.

Further information on the correspondence course may be obtained by applying to the Division of Agricultural Education, College of Agriculture, Berkeley, Cal.

You may have a stomach that will stand whisky, but the chances are ninety-nine to one that you haven't.

More Employment

Philadelphia, Sept. 22.—Replies to questionnaires sent by the Philadelphia chamber of commerce to over 100 cities in 13 Atlantic seaboard states indicate a steady increase in employment in the last six weeks. Conditions have materially improved since August 1, according to reports made in response to the questionnaires.

STEAK COMES HIGH.

At one of the market stands a farmer stopped to buy two small steaks. And they were small indeed.

As the butcher was wrapping them up he said: "Those are very fine steaks for 50 cents."

But somehow the farmer did not feel that he was getting a bargain, for he replied: "Well, I think that they should be fine steaks, for it took a bushel of corn to buy 'em."—Indianapolis News.

Long Ago.

I once knew all the birds that came And nested in our orchard trees; For every flower I had a name— My friends were woodchucks, toads, and bees;

I knew where thrived in yonder glen, What plants would soothe a stone-bruised toe— O, I was very learned then, But that was very long ago!

I knew the spot upon the hill Where checkerberries could be found; I knew the rushes near the mill Where pickerel lay that weighed a pound!

I knew the wood—the very tree— Where lived the poaching, saucy crow, And all the woods and crows knew me— But that was very long ago.

And pining for the joys of youth, I tread the old familiar spot, Only to learn this solemn truth; I have forgotten, am forgot, Yet there is this youngster at my knee

Knows all the things I used to know; To think I once was wise as he!— But that was very long ago.

I know it's folly to complain Of whatso'er the fates decree; Yet, were not wishes all in vain, I tell you what my wish should be: I'd wish to be a boy again, Back with the friends I used to know;

For I was, O! so happy then— But that was very long ago!

—Eugene Field.

Food Products Must Cease Airplaning

Richmond Draws the Usual Sunday Noise Producer

The Sunday circus is coming. A few diminutive posters announce the date, Sunday, Oct. 2. About church going time the great caravan of travel-stained and tired out circus employees will celebrate the "day of rest" by working, for there can be no effective organization of "common laborers" attached to a circus who can assert their rights relative to working conditions.

The derelicts, floaters and crooks will be on hand Sunday circus day and especially at night. The usual Sunday circus fills in at Richmond with a small unit, the principal unloading being done at Oakland and San Francisco where several days' anchorage is made.

The "good pickins" for the circus is not extended to the itinerants this year. The workingman's family need the money. Father cannot dig up a dollar and a half admission fee for a hard seat and the same old "chestnuts" again this trip.

It is a safe bet that the Sunday circus will not leave Richmond with the usual \$10,000 donation.

Yes, the circus will leave something, but not much.

It will be the small city license fee and a number of stake holes at First street where the tents were anchored.

Condition in Michigan

Detroit, Sept. 22.—More than twice as much grain has been moved out of Michigan this year as for any similar period one year ago. Idleness in the industrial world is steadily diminishing. Detroit industries are operating about 75 per cent capacity. Bank deposits for the last week in August were \$39,000,000 above the low mark in April, while loans have decreased from \$65,000,000 in April to \$19,000,000.

When other people take it easy, they appear to have a lots better time than they are actually having.

He dropped a penny in the plate, Then meekly raised his eyes— The weekly rent was duly paid For mansions in the skies.—Ex.

H.C.L. Not Consistent With Reduction of Wages

Washington, Sept. 22.—The advance of food prices given by the following statistics will have a tendency to check the "cut wages" agitation now going on in certain localities, say those at the national capital who are in touch with the situation over the entire country at the present writing.

According to the bureau of labor statistics, U. S. department of labor, the retail cost of food from July 15 to August 15 in Rochester skyrocketed 8 per cent; in Buffalo 7 per cent; in Baltimore and New York 6; Milwaukee, Newark and Norfolk 5; Charleston, S. C., Louisville, Manchester, N. H., and Portland, Me., 4; Houston 3; Butte and Dallas 2 and in Minneapolis 1. These cities are fairly representative of the entire country, and the statistics given indicate that prices will advance rather than recede, the figures being for a season of the year when food prices are usually low.

The American Federation of Labor seeks to abolish the practice of fixing wages solely on a basis of the cost of living. The Federation's executive council have finally decided to undertake an investigation to develop a new policy by which the workmen would also be rewarded for their social usefulness and productivity.

Sheriff R. R. Veale Explains Legal Point

Sheriff R. R. Veale is reported as stating that he will personally appoint and deputize all guards outside the oil plants of Contra Costa county affected by the oil strike. Veale says that guards employed by the Associated Oil Co. at Martinez are not deputized and have no legal authority to exercise outside the walls of the plant.

Paul E. Randall, 22, of 116 Tunnel avenue secured a license in Oakland Tuesday to wed Florence I. Schuler, 21, of Oakland.

The Slip-on is again the Big Note in Women's New Wool Sweaters

In the realm of woolen sweaters the slip-on is again popular, and justly so combining as it does, simple nonchalance with comfort. The V neck and round neck are in equally good taste.

Tuxedo models display simple elegance, and are always popular. These include the long or half tuxedo front. The weaves are smart and varied the colors and combinations of colors are remarkably complete.

But if you want the newest thing, it is the Co-Ed. This delightful college style button at the neck with the smart Peter Pan collar.

The popular yarns this season are mohair, camel hair, alpaca, worsted and Vicuna, while among the shades in greatest demand are white, pink, honey-dew, turquoise, tomato, henna, green, tan, purple, rust, burr, brown, navy and black. The prices range between \$6.95 and \$28.50.

Golden State News

TERSELY TOLD

Chico. A skunk invaded the city hall one evening recently and forced the desk sergeant to vacate in his favor. It was earnestly hoped by local authorities that the animal was not seeking the marriage license bureau.

Los Angeles. The appalling increase in automobile accidents, largely caused by irresponsible or uninsured operators, has created a tendency toward compulsory state insurance, it was said at the annual convention of the National Association of Insurance Agents here.

Santa Cruz.—The delegates to the California Retail Grocers' Association convention, which closed September 14, took an automobile trip to Watsonville, September 15. They were taken around the Pajaro valley by a delegation from the Watsonville Merchants' Association.

San Diego.—The San Diego Chamber of Commerce announced September 14 that it had passed resolutions urging Governor Stephens to call a special session of the Legislature to enact laws regulating more strictly the operation of heavy trucks on state highways.

Palo Alto.—Mrs. Herbert Hoover left Palo Alto, September 13, by motor for Washington, D. C., accompanied by her father, Charles Henry of Monterey. She will drive her own car across the continent. Mrs. Hoover was called west by the serious illness of her mother, who died before her arrival.

Woodland.—Constable Isaac Clover and Federal Officer Hiram Smith, September 13, raided a blind pig at Broderick, and arrested Mr. and Mrs. C. Deprato, C. Bellatoni and Tony Tonelli. Clover drank gin, jackass brandy and wine in the course of his investigations of the place and he says he never was so sick in his life and has asked for a vacation to recuperate.

Santa Barbara.—Rob Wagner of Los Angeles, "poet laureate of the movies," characterized "The Arbutus of the screen" as "excesses on the moving picture industry." "If a moving picture actor or actress gets into trouble," he said, "people say 'Oh, oh, those picture people, again.' They forget Henry the Eighth and the Stillmans, but they treasure all our misdeeds."

San Francisco.—John Smith, 15 years old, 266 Seventeenth avenue, and Felix Dreyfus, the same age of 389 Seventeenth avenue, were seriously injured when an auto truck driven by Smith collided at Twelfth avenue and Cabrillo street with an automobile driven by Leslie Bonhage, 16, 451 Twentieth avenue. Both boys, it was said at the Park Emergency Hospital, had possible fractures of the skull and concussion of the brain. Bonhage was uninjured.

Fresno.—Stuck for three days in the narrow entrance to the Crystal cave, in Sequoia National Park, Thaddeus Brown, round Lemoore citizen, was able to escape only after fasting for the entire period, according to information received here. Rangers who desisted of saving his life finally hit upon the happy idea of a wholesale reduction, which, though rough, gained the desired result. Brown's waist measurements are said to have decreased fourteen and a half inches in the three-day period.

Los Angeles.—Raymond Gould, an interior decorator, September 13, filed an attachment against all the known real estate owned by Roscoe (Fatty) Arbuckle in Los Angeles as a detail to a suit for \$11,100, which Gould said was due him for decorating the house and grounds of Arbuckle's residence here. This was the second attachment brought against Arbuckle's property here within two days, the first having been filed Monday by a furniture company, which claimed Arbuckle owed the company \$6,500, said to be the purchase price of twenty-five pieces of furniture.

San Rafael. Fruit trays and boxes and dresses a la mode are taboo with the girl members of the student body of San Rafael high school. The ban was placed upon all attempts by any one member to sow the seeds of jealousy in others by means of costly wearing apparel, in a unanimous vote of the organization. The girl students are limited to a simple skirt and their choice of a muddy blouse, a jersey or a sweater. The Parent-Teacher Association has complained that the girls upon their vote to aid in the campaign for simplified school dresses.

San Francisco. Gustav Gnack, one of the early residents of Benicia, died Wednesday, September 14, at St. Francis Hospital, following a brief illness of pneumonia. He was a native of Germany, 67 years of age, and came to the United States when a boy. He went to Benicia in 1873 and five years later established himself in the brewery business there. He served as a member of the Benicia board of trustees for twelve years and was Mayor of the city for four years. He was vice president of the Martinez-Benicia Ferry Company and president of the Curtz Consolidated Mining Company.

STATE WINERIES ARE SUPPLANTED BY HOMES

Edward Sheehan Says Prohibition Has Trebled Grapemen's Profits

San Francisco.—One million homes throughout the United States have supplanted the 300 wineries that were operating in California before prohibition, and not only are they taking care of the California wine grape crop, but they are paying for grapes three times the price the wineries paid.

Such was the declaration of Edward Sheehan, president of the California Grape Growers' Exchange, September 14, at the luncheon of the California Development Association in the Palace hotel.

The value of the cooperative organizations to California growers was explained by Harry S. Maddox, state market director, chairman of the day, and Frank T. Sweet, president of the California Pear Growers' Association.

"Together we stick, divided we're stuck," was the message brought to the development association by Maddox. He urged the members to demand of their corner grocer that he enact laws regulating more strictly the operation of heavy trucks on state highways.

Palo Alto.—Mrs. Herbert Hoover left Palo Alto, September 13, by motor for Washington, D. C., accompanied by her father, Charles Henry of Monterey. She will drive her own car across the continent. Mrs. Hoover was called west by the serious illness of her mother, who died before her arrival.

Woodland.—Constable Isaac Clover and Federal Officer Hiram Smith, September 13, raided a blind pig at Broderick, and arrested Mr. and Mrs. C. Deprato, C. Bellatoni and Tony Tonelli. Clover drank gin, jackass brandy and wine in the course of his investigations of the place and he says he never was so sick in his life and has asked for a vacation to recuperate.

Santa Barbara.—Rob Wagner of Los Angeles, "poet laureate of the movies," characterized "The Arbutus of the screen" as "excesses on the moving picture industry." "If a moving picture actor or actress gets into trouble," he said, "people say 'Oh, oh, those picture people, again.' They forget Henry the Eighth and the Stillmans, but they treasure all our misdeeds."

STATE PRODUCES 50 VARIETIES OF MINERALS

58 Counties Contribute to Year's Output of \$242,099,667

The fifty-eight counties of California last year contributed one or more mineral products to a list comprising fifty distinct varieties, the value of the whole being \$242,099,667, according to a final tabulation prepared by Fletcher Hamilton, state mineralogist. The total mineral production of 1919 is exceeded by 46, 269,665, and petroleum is credited with 75 per cent of the increase.

The total value of the structural materials group jumped from \$16,796,784 to \$29,723,405, increases being shown in the production of brick and tile, cement, stone and magnesite. The industrial group showed an increase of \$2,041,981 to \$3,567,760.

A decrease of almost a million dollars in the production of potash was balanced by increases in borax and soda.

In the metals group, gold, copper and quicksilver were the only products to show a decline, but gains were made in silver and lead. The complete list of last year's mineral production in the state follows:

Substance	Value
Asbestos	\$ 20,795
Barytes	27,825
Bituminous rock	2,704,266
Borax	5,704,393
Brick and tile	14,962,945
Cement	43,031
Chromite	440,689
Clay (pottery)	5,450
Copper	2,282,503
Dolomite	132,741
Feldspar	26,189
Fueller's earth	6,000
Gems	36,000
Gold	11,311,043
Granite	105,732
Gypsum	92,545
Infusorial and diatomaceous earths	1,056,260
Iron ore	49,889
Lead	392,500
Lime	557,232
Limestone	530,581
Lithia	152,502
Magnesite	1,033,491
Magnesium salts	167,787
Manganese ore	62,323
Marble	92,899
Mineral paint	4,477
Mineral water	421,643
Natural gas	3,898,286
Petroleum	178,394,937
Platinum	68,977
Potash	1,465,463
Pumice and volcanic ash	25,890
Pyrite	53,583
Quicksilver	77,525
Salt	972,648
Sandstone	2,200
Silica (sand and quartz)	96,793
Silver	1,859,896
Soapstone and talc	221,362
Soda	1,164,898
Stone, miscellaneous	6,803,557
Zinc	96,229
Unapportioned	715,341
Total value	\$242,099,667
Unapportioned, includes asbestos, graphite and columbite (rutilantum ore).	

MOVIE ACTRESS ACCUSED OF STEALING MAN'S AFFECTIONS

Los Angeles.—How can a movie actress steal a husband's love from a wife he does not love?

This is the puzzle presented in the answer filed by Jackie Saunders to the suit of Mrs. Juanita Cohen, asking \$50,000 for the alienation of the affections of J. Ward Cohen. The actress is known in private life as Mrs. Jackie Horkheimer.

In her answer Mrs. Horkheimer does not deny having written a letter addressed to Cohen as "My Own" and ending "with all my love to you, dear, boy, Jackie." But she does deny that she knew that Cohen was married to the plaintiff. She also denies that Cohen had any affection for his wife that she, Mrs. Horkheimer, could steal.

The love which once animated Cohen's breast departed when Mrs. Cohen shot him in the office of a San Francisco attorney in 1919. Mrs. Horkheimer states. This was followed by another incident which led to a final separation between the Cohens, the defendant declares.

It was a new love, not the old one, which she accepted from Cohen, Mrs. Horkheimer claims, and one which never was possessed by his wife. Whether the affections of Cohen, new or old, can be fairly appraised at \$50,000 Mrs. Horkheimer does not try to determine in her answer, but such of them as were bestowed, she holds, were all her own.

Talks Incessantly

"Millions are involved in this divorce suit."

"Well, what about it?"

"Oh, nothing, except that when money gets mixed up in a scandal it's more garrulous than ever." Birmingham Age-Herald.

States there is one bearing fruit tree in California, and alongside these are trees not yet bearing. When they begin to bear production will be doubled. We must build the markets in the United States so that the people will eat pears and other deciduous fruits as fast as they are produced.

Advertising campaigns by the cooperative association in Boston and Philadelphia increased consumption of California pears from 100 to 200 per cent, Swett said.

U. S. Constitution Violators News of the Blind Pig World

Barber Arrested.

San Francisco.—Manuel Baraga, owner of a flat at 1018 McAllister street and a barber shop at 1019 McAllister street, was before Federal Commissioner Francis Krull, September 15, on a charge of having sold liquor at both places in violation of the law. He was held to the United States District Court for trial and later was released on \$500 bond.

Allex Stokes, an employee of Baraga, and Lennie Maraga, a sailor, arrested with Baraga, were released for lack of evidence.

Sky Pilots Seek Permits.

Hartford, Conn. Among more than 5,000 letters received recently seeking information as to permits for the making of "home-made wines" or "non-intoxicating fruit juices" were those of at least a dozen clergymen, the internal revenue bureau here announced today. The office force has been swamped with correspondence since an announcement was made that made in silver and lead. The complete list of last year's mineral production in the state follows:

Liquor Leaks in South Sought.

Los Angeles.—E. Forrest Mitchell, federal prohibition director for California, came here September 15, and directed an investigation to ascertain the source of the liquor that found its way to San Francisco and figured in the Arbutus party there.

"The national prohibition law is going to be enforced in California," Mitchell declared tonight. "It is on the statute books, the supreme law of the land, and while it is the law it must be obeyed."

"The entire state will be covered with enforcement officers. The San Joaquin valley and the Santa Clara valley have been organized. The situation in San Francisco is covered completely. I am organizing the force to operate south of the Tehachapi as far south as San Diego. It is going to be a complete job. Some people thought the amendment a joke, but it isn't, and none who violate the law will be spared in the prosecution."

STATE'S WEALTH NEARLY DOUBLES IN TEN YEARS

Assessed Valuation of California for 1921 Given As \$4,922,700,063

Sacramento.—The total wealth of California has almost doubled within the past ten years, according to reports made by the County Auditors and State Board of Equalization and estimates compiled by State Controller Ray L. Riley.

The total assessed value of the state in 1911 was given at \$2,603,265,528. The total assessed value for 1921 was given at \$4,922,700,063, or an increase of \$2,319,434,535. A comparison of the total assessed value between 1920 and 1921 shows an increase of \$367,518,379 in the last year.

In 1911 the value of real estate in the state was \$1,387,824,041, and the value of improvements on real estate was \$87,053,040. In 1921 these figures had jumped to \$2,288,475,727 and \$984,294,037 respectively, or an increase of nearly 100 per cent.

The greatest increase has been on personal property, the estimates show. In 1911 the total value of personal property in California was \$252,680,596. In 1921 it jumped to \$712,557,821, or approximately three times the figure of 1911.

Money and solvent credits in 1911 amounted to \$28,425,345, and \$32,262,775 in 1921.

The total value of non-operative property of the state was given as follows: 1911, \$2,226,013,892; 1920, \$3,785,936,573; 1921, \$4,039,253,858.

The value of operative property assessed legally also shows a tremendous increase. In 1911 it was \$236,984,745, but in 1921 it had jumped to \$640,033,334.

The value of the railroads as assessed by the State Board of Equalization was given at \$141,466,891 in 1911, and \$245,413,852 in 1921.

LOS ANGELES MAN HEADS RETAIL GROCERS

Santa Cruz.—J. Herbert Smith of Los Angeles was chosen president of the California Retail Grocers' and Merchants' Association which closed its twenty-second annual convention here September 14. Other officers named were as follows:

J. M. Conklin, San Jose, first vice president; C. E. Clinch, Grass Valley, second vice president; Felix J. Sermon, Sacramento, treasurer; D. M. Herlihy, Pasadena; G. P. Shafer, Modesto; Charles B. Pearson, Stockton; E. B. Connolly, San Francisco and Fred W. Meyer, San Francisco, were elected directors.

Before adjournment the association dispatched a telegram to Attorney General Daugherty at Washington protesting against any revision of the packers' consent decree, which is under discussion for modification. Ample resolutions passed was one declaring against all forms of license or occupation taxes.

Forty Quarts of Liquor Served.

San Francisco. Federal prohibition agents who went to Los Angeles, turned their attention back to San Francisco, where, they have learned, forty bottles of liquor were consumed at Arbuckle's party in the Hotel St. Francis, where Virginia Rappe was fatally injured. Only half of this, the Federal agents have been informed, was brought here in Arbuckle's automobile. The rest was applied to Arbuckle in the hotel by a "tall thin man" and "a dark stranger."

As a result of this, Arbuckle's \$25,000 automobile, the envy of associates in the movie world, is to be seized as a vehicle used to transport liquor illegally, according to present plans. The source of the liquor mysteriously obtained by Arbuckle in the hotel is to be thoroughly investigated.

Dry Agents Arrest Thirteen.

San Francisco.—Thirteen persons were arrested and sixteen barrels of various kinds of intoxicants confiscated in a series of raids conducted by Federal prohibition officers, September 15, with the cooperation of the police. G. H. Crawford was in charge of the Federal force of seven men and Police Captain Arthur D. Layne headed a police squad of four men.

Robert Mitrovich and S. J. Gillich were arrested at 410 Divisadero street, and at 643 Montgomery street, a large quantity of wines and whiskey was seized.

The Bank Restaurant at 842 Kearny street was raided and the proprietor, Angelo Norris, arrested, after the officers had purchased liquor in the place.

At 411 Broadway the officers said they found liquor being served at the tables and arrested Charles Bozzi, the proprietor.

At the Louise Hotel, 75 Hinkley alley, the biggest haul of the evening was made when nine fifty-gallon barrels of red wines, one twenty-five gallon barrel of white wine, five fifty-gallon barrels of jackass brandy were about a barrel of jackass brandy were seized.

VERDICT "ACCIDENTAL" IN SCHOOLBOY KILLING

Martinez.—The alleged shooting of Lawrence Casey by Richard Johnston, both 8-year-old schoolboys, in front of the Johnston boys' home on September 7, after the Casey boy is said by the authorities to have "dared" the other boy to shoot, was held to be accidental by a Coroner's jury which held an inquest into the Casey boy's death. Mrs. Harry Blair, the only woman member of the jury, returned a minority verdict, in which she held the parents of the Johnston boy responsible for the shooting "for leaving a loaded gun in the house."

San Francisco.—Mrs. George F. Thomas, wife of the second assistant high-school tender stationed on the Farallone islands, was brought to a private sanatorium in San Francisco, September 15, by the coast guard cutter Tulare, which responded to S. O. S. sent out by Mrs. Thomas, who resides with her husband in the light-house, was taken suddenly ill about daybreak. With the nearest medical assistance in San Francisco, her husband sent out an S. O. S. call, which was picked up by the light-house to H. W. Rhodes, United States light-house chief in the Custom House.

Woodland.—R. A. Barton, Dunnigan farmer, R. W. Harrison, justice of the peace of Woodland township, and an unidentified man were arrested here by Patrolman Hardy Goodin for "shooting craps" at a local hotel far into the morning hours. The township justice, who has meted out severe punishment to local violators of the law, explained that although he was 48 years of age he had never before shot craps in his life, and that rolling the bones, even though he was losing \$5 bills at each flip, was such a fascinating novelty that he forgot the law.

Sacramento.—One-third of all Japanese in California are under ten years of age, according to estimates made public by L. E. Ross, director of the bureau of vital statistics of the State Board of Health. Ross' estimates show that during the last ten years the Japanese population has increased 30,596 in California, and that births have exceeded the deaths 20,191, or 66 per cent of the entire increase. The 1920 Federal census shows the Japanese comprise 2.1 per cent of the population of the State. According to Ross' estimates they furnish 7.4 of all deaths.

San Francisco.—In recognition of his courage in giving a sufficient amount of skin to save the life of a comrade burned by fire, 13-year-old Richard L. Weaver, a member of the Point Reyes troop of Boy Scouts has been awarded a silver medal by the national court of honor of the Boy Scouts of America. The medal will be awarded at a rally of all San Francisco Scouts on the evening of October 4 in Native Sons' hall.

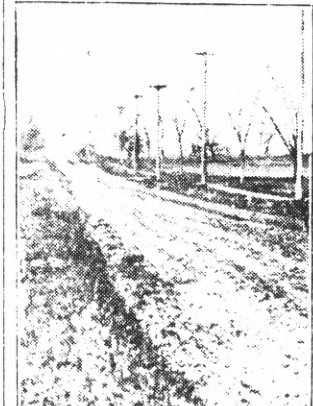

Burlingame.—An unidentified man was instantly killed when the motor cycle on which he was riding en route to San Francisco, struck the rear end of a truck at the north gate of Burlingame.

IMPROVED ROADS

SAND-CLAY ROADS SUITABLE

Material Often Mixed on Road Bed by Traffic—Disk-Harrow Used to Advantage.

In construction of sand-clay roads the necessary drainage is first provided, and then the most suitable clay obtainable hauled and spread on the road to such a depth as tests have shown to be necessary to form a road surface eight to ten inches deep. In general, this will be about six inches at the center and tapering toward the sides. Professor House of the Colorado Agricultural college says that in the best sand-clay roads, analysis gives the following proportions: Sand

If Good Care Is Exercised in Building Sand-Clay Roads Are Satisfactory.

about two-thirds, clay one-third. As the purpose of the clay is to fill the voids and coat the grains of sand, six inches of loose, or three inches of compact clay, should make a sand-clay surface of the proper mixture between eight and ten inches thick.

After the clay is spread, it will generally be found advisable to cover it with a little sand, which can be done by means of the road machine or grader. The next step is thorough incorporation of the materials. The mixing proper may be done in a number of ways and to suit the facilities of the builder. If the work is done just preceding or during the rainy season it may be left entirely to traffic, with frequent shaping by the road grader, or drag, after heavy rains, but this process is hard on traffic and requires a long time. The mixing can be done most efficiently by means of a disk-harrow, either driving or immediately after a rain, or the water may be added with a sprinkling cart. The first partial mixing may be done dry, but the final mixing must be thorough and should be done when the entire road surface is completely saturated with water until a plastic mortar-like mixture is secured. This should be followed by a final shaping with the road machine and compacting by either a roller or by traffic.

HOW TO PATCH GRAVEL ROAD

Work Should Always Be Done When Road Is Wet, Preferably When Water Is Standing in Ruts.

Patching is usually neglected or done in such a way as to cause two ruts to form where there was but one before. That is the inevitable result of doing a rut too full. This work should always be done when the road is wet, preferably when the water is still standing in every little hollow on the road surface, so that the workmen can just see where to place the new gravel and about how much is needed.

Unless the rut is a very large one, it is always best to shovel the gravel from the wagon into it, rather than to raise a sidewalk and attempt to dump a part of the load. Patching done in the proper manner when the road is wet, followed by a road drag, will maintain an old gravel road surface as good as new until it is so badly worn that an entirely new surface is required. The gravel should never be poorer than that forming the surface layer of the old road, and especially should contain a little, but not an excess of clay.

FRUIT TREES FOR HIGHWAY

Not Very Apt to Be Broken Down by Overzealous Collectors If They Are Common.

Elm, hackberry, or even nut trees and fruit trees are good to plant along highways. The objection to fruit and nut trees is that they may be broken down by overzealous collectors of fruit. This is not apt to happen if they are common on the highway.—Le Roy Cady, associate horticulturist, University Farm, St. Paul.

Poor Roads Dismal.

Once in the city, the young folks are not willing to travel over the bad roads back to the farm.—Bettor Roads.

Good Road Advantages.

A good road picks up a farm ten miles out and moves it five miles in.—B. F. Youkum.

Community Is Benefited.

Good roads benefit a community by making travel quick, safe, and comfortable.

BOY SCOUTS

(Conducted by National Council of the Boy Scouts of America.)

SCOUT LIFE SAVERS.

From October 1920 to July 1921 the following boy scouts have been awarded medals for heroic services by the National Court of Honor:

Gold medals—Dale Collier, Rock Island, Ill.; Joseph H. Mardis, East Liverpool, Ohio; George Noble, Charleston, Iowa.

Silver medals—Myers Chafres, Spring Hope, N. C.; Van Clemen, Kewanee, Ill.; Gordon M. Crowley, Pittsfield, Mass.; Frederick Doty, Plainfield, N. J.; Sam A. Fitch, Houston, Tex.; Walter Erick, Philadelphia, Pa.; Kenneth Gardner, New York; Marcus Ginsburg, Chicago, Ill.; John Hollings, Pleasantville, N. Y.; George J. Howell, Newport News, Va.; Robert R. Humphreys, Fresno, Cal.; Arthur T. Lee, Newark, N. J.; Leslie Lumbatis, Belleville, Ill.; Robert McAffin, Topeka, Kan.; Gerhard McKee, Ontario, Cal.; Edward Moraves, Westfield, Mass.; Charles Pasho, Syracuse, N. Y.; Austin J. Pover, Brooklyn, N. Y.; C. E. Ross, Wheeling, W. Va.; Arthur Sommerfeld, Chicago, Ill.; Elmer R. Walker, Mott, N. D.; and Harold White, Lowell, Mass.

Henceforth, there will be only one grade of medal awarded, made of gold and specially designed by Belmont Brown, the well-known explorer. The medal will be awarded only in cases of life-saving, involving actual risk of life to the rescuer. For other service in saving of life and first aid letters of commendation will be awarded. Dale Collier of Rock Island, Ill., will be the first recipient of the new design medal, which he earned splendidly by a spectacular feat of ice rescue last winter.

BOY SCOUTS IN HUNGARY.

Scouting is ten years old in Hungary and, though the war stopped its growth for a time, the movement was reorganized and put on a firm basis in September, 1919. In its earlier stages the Hungarian scout association was, like the German, a semi-military organization, but with its re-establishment it has rejected the military element and founded itself on the British and American nonmilitary basis. The dismemberment of Hungary was a severe blow to the progress of the movement inasmuch as more than 50 per cent of the Magyar troops are now in occupied territories. Officers, money and equipment are badly needed. Some of the boy scouts have no money even

BAY CITIES BUSINESS DIRECTORY

BATHS, MASSAGE, BLACKHEADS
TURKISH BATHS with massage treatment and bed, \$1.00. Open day and night. Tub and shower bath, 20c. 3001 Mission St., S. F.
9th and Franklin Sts., Oakland.

BABY CARRIAGES
GENUINE red carriages, upholstered in corduroy. Reversible gear. Factory price, \$30.00. Hughes Hatten Co., 125 Valencia St., S. F.

FURRIERS, FURS REPAIRED
FURS and coats remodeled and repaired at very reasonable prices. Seal skin coats redyed and made like new. Fur trimmings and made up. Chicago Coat and Suit Co., 975 Market St., S. F., near 10th St.

N. W. Corner Minna Street
Mail Orders Given Careful and Prompt Attention. Samples Sent on Request.

H-H EXTRACTS
Best for home brewing. Easy to make. Only boil 10 minutes. 1 can makes 5 gal. Price \$1.25. Special price on larger quantities. All kinds of Copper Boilers, Spirit Fenders and other supplies. Mail orders promptly filled.

H-H SYRUP CO.
(R. J. Minton, Prop.)
921 Fillmore Street—San Francisco, Cal.

COUNTY DISTRIBUTORS WANTED
For COLE VISIBLE GAS LINE GAUGE. A real proposition for a live man in each County. Write or call T. S. ESREY, 1540 Van Ness Ave., San Francisco, California.

LADIES! Irregularities quickly relieved and cured with Stanton's E. M. Tablets. Money back if dissatisfied. Price, by mail, \$1.00.
BELL PHARMACAL CO., Distributors
1005 Market St. San Francisco

Baking Powder Biscuits
One quart of flour, one small teaspoonful of salt, one teaspoonful of sugar, and two teaspoonfuls of baking powder, sifted together. Rub in a tablespoonful of butter, lard, or other shortening; add one pint of milk or half milk and half water, and form into a smooth dough, but handle as little as possible and pat out the dough on the board and cut with a small cutter. Brush over with milk and bake in a hot oven for about twenty minutes.

For Breakfast
Mince some cold ham, meat, or poultry, and add to it half a teaspoonful of chopped parsley, some cream, and pepper and salt to taste. Now stir in the beaten yolks of four eggs, then add the whites to a stiff froth, and pour the mixture into your frying pan, in which you have melted about an ounce of butter. Stir lightly till it begins to set, then double it, and turn out on a very hot dish.

Cuticura Soap
—SHAVES
Without Mug
Cuticura Soap is the favorite for safety razor shaving.

PERSONALS
MAICLY—Thomanda congenial people, worth from \$1000 to \$50,000 seeking early marriage; descriptions, photos, introductions free. Social, Editor adv. Send no money. Address Standard Cor. Club, Grayslake, Ill.

PLEATING—HEMSTITCHING
BUTTONS and buttonholes to order. Prompt mail order service. Steele's Button Works, 224 Ellis St., S. F. Send for catalog.

WATER PIPE
ALL SIZES of pipe and screw castings, both new and second-hand, dipped and undipped, guaranteed; price right. SPECTER PIPE WORKS, 304 Howard St., San Francisco.

WINCHESTER HOTEL
3rd and Market Sts.

923 Mission Street, opposite MINT. 200 outside rooms. Both under one management. All modern conveniences. Unexcelled for location, cleanliness and service. Rates: \$1, with bath \$1.50 and up. Special rates by the week.

HOTEL REGENT
562 Sutter St., San Francisco.
Downtown family hotel, for families, ladies and children and business people. Rates: \$1.25 day up, with bath \$2.00 day up, with meals \$3.00 day up, with bath \$3.50 day up. Breakfast 50c, Luncheon 50c, Dinner 75c. Chicken dinner Sundays and Thursdays \$1.00. Take Sutter st. car from Ferry, from 1st at depot take Kearny st. car, transfer at Sutter, off at Mason st.

Norway's Water Power
Hydro-electrical energy constitutes one of the most valuable resources possessed by Norwegian industry and trade. The value of the waterfalls of Norway lies not alone in their numerousness, but also in their favorable location; many of them lying in the immediate vicinity of the sea coast and of good harbors. The natural wealth this water power represents has been more conducive than any other factor to the rapid expansion of Norwegian industries during recent years. It has even been said that industrial Norway has been built up entirely on white coal.

There has not existed any complete survey of the volume of water power available in this country. The Directorate of Watercourses has, however, prepared a provisional survey of the power volume the various water courses will be capable of yielding when harnessed, and also the power volume already harnessed.

The following water courses have the greatest volumes of exploitable power:
Skein, 924,700 horse power; Drammen, 756,550; Glommen with tributaries, 621,900; Gudbrandsdal with tributaries, 541,000; Numedal with tributaries, 428,200; Suldal, 349,800; Otra with tributaries, 303,900, and the Tyssse, in Odda, 300,000.—Norwegian Trade Review.

Home-Made Veal Sausages
Take equal quantities of lean veal and fat bacon, some fine sage leaves, and a few anchovies, washed and boned, and chop them finely. Put all into a mortar and beat well. Form into rolls with floured fingers, dip into beaten egg, then into bread-crumbs, and fry in boiling fat. Toast or fried bread-crumbs may be served with the sausages.

Cuticura for Pimples Faces.
To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. Once clear your skin clear by using them for daily toilet purposes. Don't fail to include Cuticura Talcum.—Advs.

Economical Croquettes
Any remains of beef, mutton, rabbit or fish which are left over after meals may be put into a saucepan with a little white sauce, pepper, and salt, and a little chopped onion, if the latter be preferred. Stir over the fire for a few minutes to set, then spread on a plate to cool. When quite cold divide the pieces into balls, cakes, or any shape which may be chosen, dip into beaten egg and bread-crumbs, and fry in hot fat.

The SANDMAN STORY

SUNMAN HELPS WIND.

ONE night the Wind and the Rain met in a field and such a quarrel as they began at once. "Got out of my way," said the Rain, "or I will drench you until you cannot move."

"Ha, ha," laughed the Wind. "I guess you do not know to whom you are speaking. Why, I can drive you before me and send you where I like."

This made the Rain very angry and down it came faster and heavier than ever to show how powerful it could be, but the Wind only blew harder and drove the Rain against the trees

and bushes until they lay flat upon the ground and the Rain stood in little pools.

Then across the field the Wind drove it until it struck the big farm buildings and ran in great tears down the sides, splashing upon the ground.

But though the Wind blew and drove the Rain as it bragged it could, the Rain in little rivers and pools called out that it would show its power in a short time by making floods which would rise high and cover the land.

It was then that the Wind began to think it must end the quarrel and in some way that would stop the Rain, for though it knew the Rain could never overpower it, the Rain did not, and in trying to show its strength it would do great harm.

And then it was, too, that the Wind discovered that it could not do this alone, in spite of its bragging and being able to drive the Rain before it.

As soon as the Wind stopped blowing and began to think, the Rain came down faster and faster and the pools grew into little ponds, for now it was sure it had overpowered the Wind and was master of everything.

But this was not true, for over the tree tops and over the hills and mountains went the Wind, running swiftly toward the east, for there it knew was Mr. Sunman, and he could always make everything right.

"Oh, Mr. Sunman," called the Wind, "wake up quickly and get up. There is something terrible happening," and then it told Mr. Sunman all about it, taking its part of the blame.

It was very hard for Mr. Sunman to get up that morning for the Rain had thrown thick blankets of clouds over him while he slept, but with the help of the Wind he at last threw them off and up he got and away they ran.

Up higher and higher they went, and in a short time away went the Rain and even the ponds and little rivers and pools were soon taken care of, and all that remained of the dreadful quarrel were the tears of rain dropping from the leaves.

The Wind carefully ran among the trees and helped Mr. Sunman dry them, and by and by all was well in the land, and now the Wind always goes over the hill and mountain tops early in the morning to awaken Mr. Sunman and sometimes if you listen you can hear the sound of its heavy breathing as it runs.

IT WAS THEN THAT THE WIND BEGAN

THE RIGHT THING AT THE RIGHT TIME
By MARY MARSHALL DUFFEE

GIFTS FOR THE BRIDE
Never do a thing concerning the rectitude of which we are in doubt—Pliny the Younger.

REMEMBER that wedding gifts are always sent addressed to the bride-to-be even though you may never have met her and you are a friend only of the bridegroom-to-be. If you receive invitations to the wedding or know of it before it occurs then the gift should always be sent before the ceremony and the present addressed in the bride's maiden name.

Silver and other articles to be marked with an initial should bear the first letter of the bride's maiden name, usually. There are, however, some young women who prefer to follow the continental European fashion and have their silver, etc., marked with their married initial. If you know this to be the case have your gift marked in this way.

If you do not know of the marriage until after it has occurred the gift should still be sent to the bride only, but it should of course be addressed to her married name.

A wedding gift may be something personal for the bride or something that is for both bride and groom as an article of household decoration or furnishing. It should never be something that is especially suitable for the bridegroom, as for instance, a smoking stand.

The understanding usually is that if you receive invitations simply to the wedding ceremony at the church no present is due, but that if you are invited to the house to the wedding or a wedding reception a present is in order. Now, it is never in reality bad form not to send a wedding present if you do not feel able or if you do not think enough about the persons from whom the invitation is received to wish to do so. If you do not send a present, however, simply through indifference, then do not attend the wedding party, but write timely regrets.

Even though you are not invited to the house or in fact are not invited to the wedding at all, if the one married is a dear friend you are quite right in sending a present if you wish to do so. In order not to give the bride something that she would not care for if the wedding ceremony at the church is a letter, perhaps, to make these through a third person and not to ask the bride personally, but rather a sister or close friend.

It is customary for the bridegroom to give the bride a present of some sort of jewelry on the occasion of the wedding, but this is by no means essential. The bride sometimes also makes the bridegroom a present at this time, but this is even less essential. In Persia the bridegroom gives the bride-to-be a present of two complete dresses, a ring and a mirror. In our own country the bridegroom must never make the bride a present of any part of her trousseau and, though he may give her jewelry that she wears on her wedding dress and her bouquet, he must supply no other part of her bridal array.

PROFITS DEPEND ON PACKING

High Percentage of Rejections of Fruit Shipments Is Due Largely to Carelessness.

Prepared by the United States Department of Agriculture
Carelessness in grading, packing and loading are largely responsible for the high percentage of rejections which occurs in the handling of fruits and vegetables, say marketing specialists of the United States Department of Agriculture.

Satisfactory compromises can be made only where both the shipper and the buyer are broad-minded and willing to make reasonable concessions.

On entering an Indian tepee one usually finds the first space on the right of the doorway occupied by the woodpile; the next, by the wife; the third, by the baby, and the fourth by the husband. Opposite these, on the other side of the fire, the older children sit. The plan was developed until now the story tellers are put through a regular course of training in the stories they are to tell. The story tellers use a brass disk-like instrument to draw their crowds and are a time-honored institution. To make this method effective it was necessary to pick out goods that might make a wide appeal. The cigarette concerns originated the idea, and most successfully. Others since have taken up with it.

Owing to the inability of the bulk of the population of China to read or write newspaper advertising is comparatively limited and few papers are printed for the Chinese. Pictorial appeal to the eye is generally in use in the form of posters, practically all of which are printed in China and some of which use colors freely. All sorts of posters are in use. The cigarette sold are largely made from American tobacco by British-American interest and are produced in China by native workers.—Boston Transcript.

One evening a husband who had a mind that delighted in facts laid down the paper, was silent for a moment, and then said, "That's odd." "What is it?" inquired his wife. "Why, here is a man who says it would take twelve million years to pump the sea dry at the rate of one thousand gallons a second!" His wife sat thinking the matter over. "Why, Theodore," she said at length, "where would they put all the water?" Family Journal.

Mike Flannagan, living in a remote part of Ireland, had never had occasion to travel by rail, so that when circumstances made it necessary for him to take his first journey he was quite unaware of the manner

of procedure at the railway station. It so happened that a young lady went up to the booking office and said, "Polly Hill, please." So Mike marched up and called through the pigeon-hole, much to the mystification of the clerk, "Mike Flannagan, married, and one child!"—Family Journal.

Current Rock Cobs
Weigh out half a pound of self-raising flour, and rub in three ounces of butter, lard, or drippings, and a quarter of a pound of currants, one ounce of candied orange peel, chopped finely; add the grated rind of a lemon, beat up an egg, add as much milk to the egg as will moisten the flour to a stiff paste, grease a baking-tin, lightly drop the mixture on in small heaps, and bake in a quick oven. After being baked, place them on a sieve, and dredge with powdered sugar.

Drainage Increases Yields
Lands Uncertain in Production Are Made Productive and Aids in Tillage of Crops.

Drainage usually increases the yields and profits of crops. It makes lands that are uncertain in production produce crops every year.

It brings into cultivation lands otherwise worthless, and improves the physical condition of soil by making it more granular, porous, and friable. Drainage warms the soil, and by warming it causes the seed to germinate more readily, producing a better stand and a prompt growth.

Drainage aids in the preparation of land and the tillage of crops, permitting earlier plowing and cultivation after a rain.

It improves health conditions by removing the sources of malaria.

BUSH FRUITS NEED MOISTURE
Raspberries and Blackberries to Make Good Crop Must Have Supply of Water.

Bush fruits, particularly raspberries and blackberries, require a heavy and constant supply of moisture during the fruiting season in order to make a good crop, whether considered from the standpoint of quantity or quality. Quality berries can never be produced where the moisture supply is limited, and often when the season is amply supplied with moisture the bearing period will be prolonged an extra week or so. Cultivation will tend to conserve the natural moisture in the soil for the benefit of the berries, but it is a tedious job, involving a great deal of time and labor at a season when it can hardly be afforded, due to the general rush of farm work.

BAGGING GRAPES IS FAVORED
Good Thing for Farm Where There Are Few Vines Even if There Were No Black Rot.

Bagging the grape clusters is a good thing for the farm with a few vines, even if there were no black rot; but spraying with bordeaux mixture is the sovereign remedy for this disease, as well as for grape-foliage diseases. Spray just as the buds are swelling and repeat several times during the season.

If leaf-eating insects commence to make trouble, add arsenate of lead paste to the bordeaux spray—one pound of the paste to 20 gallons of water.

A LINE O' CHEER
By John Kendrick Bangs.

THE WAY.
WHEN everything is said and done The Principles of Washington Are Beacon Lights to lead us on To where true Freedom waits upon us.

In any kind of mortal stage, Through Honor, Faith, and Self, And courage in the face of Stress, The road to Freedom lies, and they Who travel it will find the way. (Copyright)

How It Started
THE first breech-loading rifle, or rather, gun, belonged to Henry VIII of England, who had a matchlock of that type. Henry IV of France invented one for his army, but it was not successful. The breech-loading type languished till the Civil war, which began with muzzle-loaders and ended with breech-loaders, proving again that necessity is the mother of invention.

(Copyright)

Mother's Epistle.
The following bit of rhymed correspondence which a contributor sent us is timely and we are glad to print it: "Dear John: We got here Monday night. (How cool the sea breeze feels!) The yachts here are a pretty sight. (Where do you get your meals?) The hotel fare I can't commend. (We've joined the bathing throng.) Be good till I get back. (Please send your salary right along.)"—Boston Transcript.

PROFITS DEPEND ON PACKING

High Percentage of Rejections of Fruit Shipments Is Due Largely to Carelessness.

Prepared by the United States Department of Agriculture
Carelessness in grading, packing and loading are largely responsible for the high percentage of rejections which occurs in the handling of fruits and vegetables, say marketing specialists of the United States Department of Agriculture.

Satisfactory compromises can be made only where both the shipper and the buyer are broad-minded and willing to make reasonable concessions.

On entering an Indian tepee one usually finds the first space on the right of the doorway occupied by the woodpile; the next, by the wife; the third, by the baby, and the fourth by the husband. Opposite these, on the other side of the fire, the older children sit. The plan was developed until now the story tellers are put through a regular course of training in the stories they are to tell. The story tellers use a brass disk-like instrument to draw their crowds and are a time-honored institution. To make this method effective it was necessary to pick out goods that might make a wide appeal. The cigarette concerns originated the idea, and most successfully. Others since have taken up with it.

Owing to the inability of the bulk of the population of China to read or write newspaper advertising is comparatively limited and few papers are printed for the Chinese. Pictorial appeal to the eye is generally in use in the form of posters, practically all of which are printed in China and some of which use colors freely. All sorts of posters are in use. The cigarette sold are largely made from American tobacco by British-American interest and are produced in China by native workers.—Boston Transcript.

One evening a husband who had a mind that delighted in facts laid down the paper, was silent for a moment, and then said, "That's odd." "What is it?" inquired his wife. "Why, here is a man who says it would take twelve million years to pump the sea dry at the rate of one thousand gallons a second!" His wife sat thinking the matter over. "Why, Theodore," she said at length, "where would they put all the water?" Family Journal.

Mike Flannagan, living in a remote part of Ireland, had never had occasion to travel by rail, so that when circumstances made it necessary for him to take his first journey he was quite unaware of the manner

of procedure at the railway station. It so happened that a young lady went up to the booking office and said, "Polly Hill, please." So Mike marched up and called through the pigeon-hole, much to the mystification of the clerk, "Mike Flannagan, married, and one child!"—Family Journal.

Current Rock Cobs
Weigh out half a pound of self-raising flour, and rub in three ounces of butter, lard, or drippings, and a quarter of a pound of currants, one ounce of candied orange peel, chopped finely; add the grated rind of a lemon, beat up an egg, add as much milk to the egg as will moisten the flour to a stiff paste, grease a baking-tin, lightly drop the mixture on in small heaps, and bake in a quick oven. After being baked, place them on a sieve, and dredge with powdered sugar.

Drainage Increases Yields
Lands Uncertain in Production Are Made Productive and Aids in Tillage of Crops.

Drainage usually increases the yields and profits of crops. It makes lands that are uncertain in production produce crops every year.

It brings into cultivation lands otherwise worthless, and improves the physical condition of soil by making it more granular, porous, and friable. Drainage warms the soil, and by warming it causes the seed to germinate more readily, producing a better stand and a prompt growth.

Drainage aids in the preparation of land and the tillage of crops, permitting earlier plowing and cultivation after a rain.

It improves health conditions by removing the sources of malaria.

BUSH FRUITS NEED MOISTURE
Raspberries and Blackberries to Make Good Crop Must Have Supply of Water.

Bush fruits, particularly raspberries and blackberries, require a heavy and constant supply of moisture during the fruiting season in order to make a good crop, whether considered from the standpoint of quantity or quality. Quality berries can never be produced where the moisture supply is limited, and often when the season is amply supplied with moisture the bearing period will be prolonged an extra week or so. Cultivation will tend to conserve the natural moisture in the soil for the benefit of the berries, but it is a tedious job, involving a great deal of time and labor at a season when it can hardly be afforded, due to the general rush of farm work.

WELL-REGULATED TEMPER

As there are six different ways of building camp fires, it should be explained that my friends built theirs according to the Ojibway custom; that is, in the so-called "ledge fashion," by placing the sticks upright, leaning them together and crossing them over one another in the manner of lodge poles. When the fire was lighted the wind shields formed a perfect draft to carry the smoke up through the permanently open flue in the apex of the structure, and one soon realized that of all tents or dwellings, no healthier abode was ever contrived by man, indeed, if the stupid, meddlesome agents of civilization had been wise enough to have left the Indians in their tepees, instead of forcing them to live in houses—the ventilation of which was never understood—they would have been spared at least one of civilization's diseases—tuberculosis—and many more tribesmen would have been alive today.

On entering an Indian tepee one usually finds the first space on the right of the doorway occupied by the woodpile; the next, by the wife; the third, by the baby, and the fourth by the husband. Opposite these, on the other side of the fire, the older children sit. The plan was developed until now the story tellers are put through a regular course of training in the stories they are to tell. The story tellers use a brass disk-like instrument to draw their crowds and are a time-honored institution. To make this method effective it was necessary to pick out goods that might make a wide appeal. The cigarette concerns originated the idea, and most successfully. Others since have taken up with it.

Editorial Comments

Well Within Their Rights

The national bar association was on perfectly sound footing when it criticised—castigated in truth—Judge Landis. Reputable lawyers must rely upon reputable judges, not only as honest as Judge Landis really is, but punctilious as to their standing. They must be far seeing in avoiding all chances of suspicion. Reckless and dishonest lawyers can successfully practice before judges whose ermine is frayed at the edges and spotted in places.

Landis' position is indefensible. The national game has become a huge business transaction, perhaps millions of dollars invested as capital alone.

At the close of a season several hundred dollars may rest upon an issue which Judge Landis may be asked to determine.

This financial magnitude, per se, places baseball among the important business organizations of the nation. Will anyone assert that Judge Landis could ethically or decently make such an agreement with any great organized industry as he made with the baseball agglomeration.

Any judge, any official, might in a given instance see his way clear to arbitrate a trouble such as an industrial dispute. In fact, his action might be highly praiseworthy—always and sharply provided that his services were rendered freely and without pay.

No judge can serve two masters. The acceptance of a salary creates at once the relation of an employer and an employee who is morally bound to carry out instructions. Our judiciary must be kept free from any cause for suspicion.

Ain't What It's Cracked Up to Be

A hot time in the old hotel tonight, wine, women and song. A short life and a merry one. Fat and jolly.

Hard to Teach Old

Dogs New Tricks

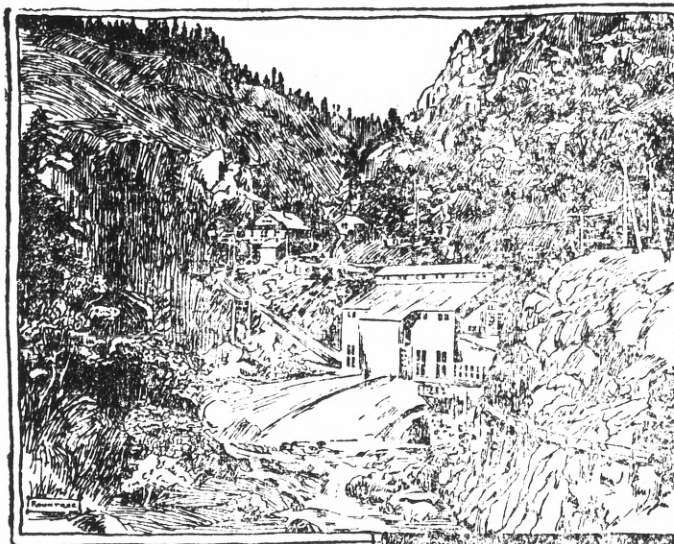

The trained state-men and diplomatists of Europe will have a time of it when they attempt the Harding peace conference in liberal, universal and unselfish spirit. A horse race is to them a horse race—no team work. A contest means sparring for advantages, dainty fencing and deadly thrusts. Will it be possible for them to see and work for the good of the whole world?

HIS FINGER IN INK WELL.

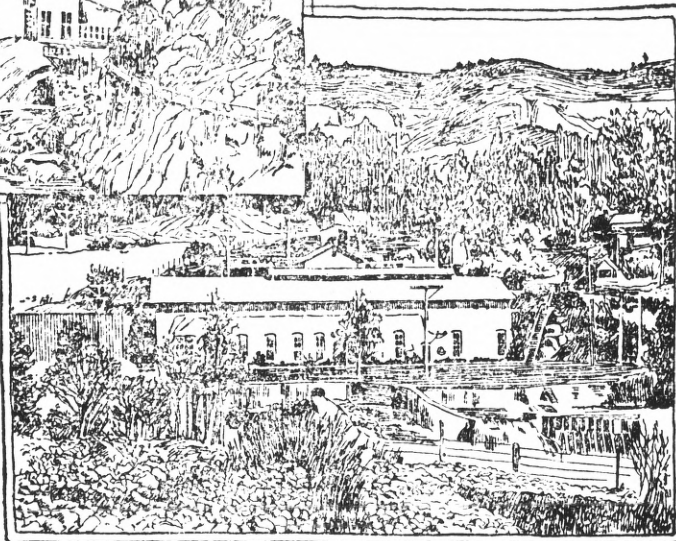

When I was a young man, a substitute teacher in a large high school, I was given a class in physiography. It was the beginning of the semester, and I wanted to impress upon my pupils the value of the subject.

I stated a few facts in a very firm voice, and then to emphasize one point in particular I brought my index finger down hard on the table. When I looked down, I found my finger in the inkwell, and with a look of blank dismay I hastily proceeded to wipe the ink off on the edge of the table, amid the roars of the boys and giggles of the girl students.—Chicago American.

Talk about the four hundred, and every man wonders who are the other three hundred and ninety-nine.

The story of a
wondrous development
in which this Company
played a leading part

NUMBER FOUR

Pioneers in Power Production

Following the establishment of the Folsom, Nevada, Yuba and Colgate plants of the Pacific Gas and Electric Company's hydro-electric system, the insistent demand for the convenient power, generated in the mountains and transmitted many miles to the industrial centers, provided the incentive to look for more power sites.

The opportunity offering to purchase the generating plant of the Butte County Electric Power Company at Centerville, this plant was added to the growing chain of powerhouses which, with the later additions, have made this Company the greatest producer of power in the West.

Almost immediately construction of a larger plant was started at a point eight miles above the Centerville plant, where the water serves the useful purpose of generating 17,425 horsepower before being turned back into Butte Creek for use again at the Centerville plant.

This upper plant is the important De Sabla powerhouse. Fifteen hundred and thirty-one feet above it, on the steep slope of the canyon wall, the water derived from the water system of the old Cherokee Mining Company and from the west fork of the Feather Rivers begins its plunge through great steel pipes to the water-wheels in the powerhouse.

This height of "head" in the pipe line causing the water to strike with inconceivable force against the whirling water-wheels, established another record for the West's pioneer power organization whose slogan is "Pacific Service."
